

Cil-lonydd Solar

Project Update - Spring 2024

CENIN

cil-lonyddsolar.co.uk

Dear local resident,

We are writing you to provide an update regarding our plans to develop a solar PV farm in Cil-lonydd. Our proposals would produce enough clean, green energy to power approximately 12,500 homes whilst bringing a wide range of benefits to the local community.

We are now getting in touch to let you know that the Pre-Application Consultation (PAC) for this project will run from the **23rd April until the 7th June 2024**.

During this time, the various sections of our draft planning application will be made available on our project website, and you will also be able to access our virtual consultation room.

The Pre-Application Consultation is an opportunity for you to find out more about our plans and for us to better understand your views and opinions on the scheme before we submit our full planning application later this year.

Please visit cil-lonyddsolar.co.uk to find out more and send any questions, feedback or comments about our proposals to jessk@cenin.co.uk or ross.irvine@rps.tetrattech.com

Martyn Popham
Director & Project Lead

To optimise utilisation of the grid network with the highest amount of clean electricity, we are sharing a grid connection with the nearby Mynydd Maen Wind Farm being proposed by RES. Wind and solar power complement each other by hitting energy production peaks at different times of day, ensuring a consistent supply of renewable power.
